

Application No. 09/786,204
Amendment dated July 30, 2003
Page 2

Amendments to the Claims:

The following claims will replace all prior versions of the claims in this application (in the unlikely event that no claims follow herein, the previously pending claims will remain):

- c/
1. (Currently amended) An edge-lit illumination system comprising:
a light transmitting sheet and a light source;
the light source being positioned in proximity to and adjacent to an edge of the light transmitting sheet, wherein at least one of two opposing surfaces of the light transmitting sheet carries markings, wherein the markings are disposed randomly within each of at least one nominal area of the at least one surface and range in length from 0.1 to 10 mm.
 2. (Previously added) An edge-lit illumination system as claimed in claim 1, wherein both the opposing surfaces of the light transmitting sheet carry markings.
 3. (Previously added) An edge-lit illumination system as claimed in claim 1, wherein the area of markings coverage in each nominal area is from 0.1 to 99%.
 4. (Previously Added) An edge-lit illumination system as claimed in claim 3, wherein the area of markings coverage in each nominal area is from 1 to 40%.
 5. (Previously Added) An edge-lit illumination system as claimed in claim 1, wherein each nominal area is of equal size.
 6. (Previously amended) An edge-lit illumination system as claimed in claim 1, wherein each nominal area is of a different size.
 7. (Previously amended) An edge-lit illumination system as claimed in claim 1, wherein the markings coverage in each nominal area is the same.
 8. (Previously added) An edge-lit illumination system as claimed in claim 1, wherein

Page 3

the area of markings coverage is different in each nominal area.

9. (Cancelled).

10. (Previously added) An edge-lit illumination system as claimed in claim 1, wherein the marking range from 0.3 to 3 mm in length.

11. (Previously added) An edge-lit illumination system as claimed in claim 1, wherein the marking are of an irregular shape.

12. (Previously added) An edge-lit illumination system as claimed in claim 1, wherein the markings are screen printed directly on to the surface of the light transmitting sheet.
